What is GGO ?

" Revolutionizing Crypto in a never before way!

GGO is a Decentralized Payments System which makes cross-chain transactions easier for smart contracts and businesses. The project aims to act as Bridge between all blockchains and allow fiat blockchain-enabled transactions at a button click. You shall control all your data with your email, where you can forget to remember long contract and wallet addresses. We plan to unleash Fiat and Crypto Swap, Spot and Margin Exchange, Liquidity Aggregation and Pool Provider, Payments and Payout Gateway with Crypto.

Just Copy, Paste and Accept.

Copy the URL, paste it into your platform, and start accepting. Yes, it's that easy.

Accept Fiat like Debit Card.

Copy the URL, paste it into your platform, and start accepting. Yes, it's that easy.

Your email is lock and key.

Remember zero addresses, everything becomes as easy as a debit card transcation.

Interconnected.

Utilize the power of 100% Decentralised Bridge with 200+ Tokens and Coins Support.

About
Team

Srikanta Magaji
CEO

Company Background

GOGAME (the parent company) was started in 2019 with a team of 3 developers, and today a team of 100+ people working from all around the world with one goal in mind to create outstanding products for the world which solves millions of problems with simple solutions.

Till date, the company has developed 200+ games from it's resources for it's own platform, and several softwares including apps and websites for it's clients since 2019.

GGO was a budding idea that started in 2019, when we were explaining about crypto to one of our clients and suddenly he said, "How can I put money in this?". That's when it stuck on mind to create a payments ecosystem to support every token, coin and web3.

GGO is on a pre-launch stage with all our minds and people ready for it. We recently launched our Referral Incentive Program which has proven extremely effective amongst every holder. Currently, we're working from 8 back offices worldwide.

Roadmap

The first and foremost timeline of GGO is to act and bring payments aggregation to its software deployment. Once deployed, the Company plans to dedicate the token to Deflationary Transaction based System and reduce GGO supply until the token supply hits 100 Million GGO.

MARCH
- Concept of GGO API is Born
- Payments, Business Survey
- Design Mockup and Production

APRIL
- AirDrop Event Phase 1
- JustEmbed Dev. Started
- Early Prototype for Testing

MAY
- Building Community
- Final AirDrop Event Phase 1
- Release the token in 5+ DEX

JUNE
- First Public BETA of JustEmbed
- Fiat Bridge for 10+ Coins/Token
- In-App Swap + Liquidity Release

SEPTEMBER
- Liquidity Push using Local PG
- Open-Chain for Games
- Deflation Announcement

AUGUST
- Staking and Validation
- Third-Party Validators
- View Transaction History

JULY
- Open-Source API for All
- Beautify Mode for Payments
- IEX in Major Exchanges

OCTOBER
- Audit & KYC in Platform
- V2 Dashboard Announcement
- 60+ Payment Methods Accepted

NOVEMBER
- PoS Machine Acceptance
- Add any Token for Listing (DEX)
- DEX Loans and Offerings

DECEMBER
- No-Gas Fees Movement
- Educate for Crypto
- Pooled Funds for Cross-Revenues
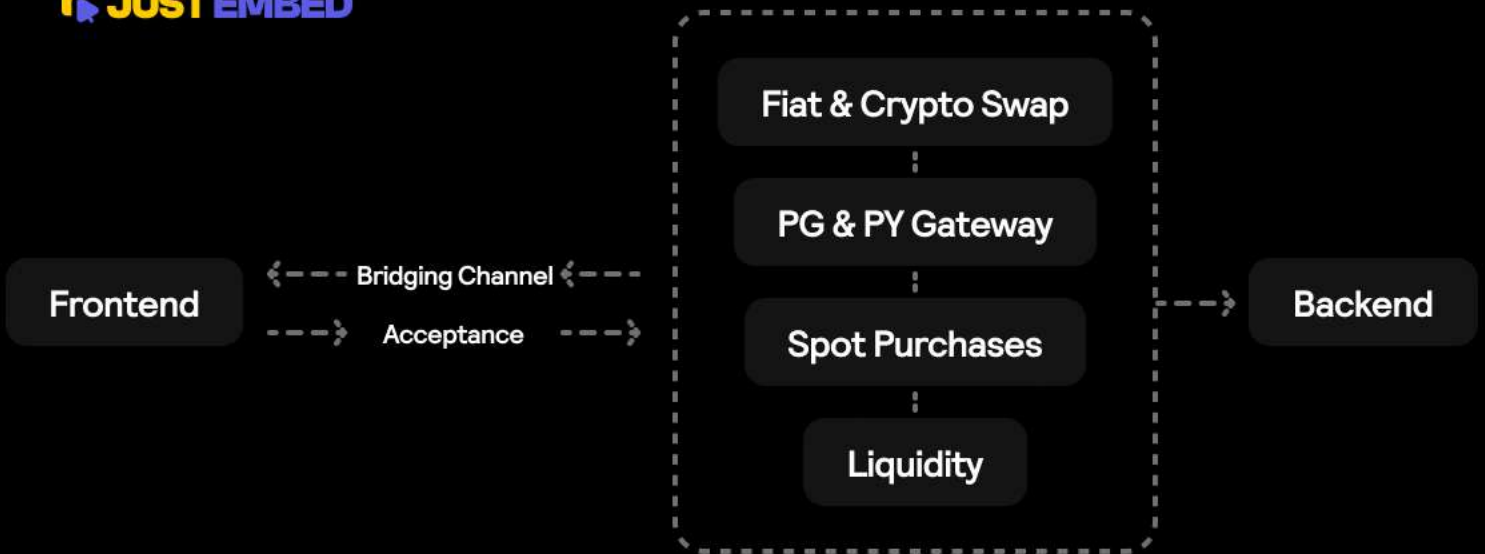

2023–∞
- To be announced soon..

Product & Technology

Coming this July!

JUST EMBED™

GGO is a Decentralised Rapid Payments Infrastructure built under BNB Smart Chain Network. Instead of long-lined wallet addresses, which are hard to remember, all your blockchain transactions are connected to your email ID, which aims to be a decentralized payments aggregator and provider, with the easiest way to accept, pay, transfer, withdraw crypto and fiat from any businesses. Developers can easily use zero-code technology without modifying existing/swapping codes. The core features of this platform are Fiat Swap, Crypto Swap, Spot, Liquidity Aggregation, Payment Gateway Fiat and Crypto, and Payouts Gateway within a spectacular module called Just Embed.

Interoperatibility

We'll enable cross-chain transactions in the coming months to align the player's ability to transact with any available crypto in the market.

Speed of Execution

The player can depend on the speed of transaction or the growth of the token with the help of multiple integrations using a universal chain and dashboards.

High Security

Our failsafe mechanism supports instant transaction switching if any suspicious activity is found via third-party network access.

Ease of Access

The ease of doing business relies on robustness of grasping and making them understand that we're trying to communicate with them.

User-Driven Token

We hear the stakeholders have a voice. You can enact for any updates, future progress, and state of play for every game and build this platform together.

Robustness

The ability of the universal software established for developers and gamers is instant, with complete autonomous provided to the developers.

How to buy GGO?

Token Address

0xa85e17Fc9018627309920a33EeD01139759607A9

This token address is very important. If you enter this in any platform you'll get the details of GGO. You have to use this address for wallet address while importing.

To buy in Fiat, please watch this <u>video</u>.

To swap with existing BNB, use pancakeswap.

Ummm... Basically we're Superman of all Cryptos.
